PAST PROJECTS

Title	:	Project Management System
Domain	:	Web Development
Link	:	https://wizard.pythonanywhere.com/
Description	:	**Project Management System** is a project management-based system where the **Admin** can assign projects to **Project Managers** with deadlines and all necessary details. **Project Managers** can then assign tasks to **Employees** with all relevant information. Employees can resolve their queries using the chat option within the system.
Role/ Responsibility	:	Developed a backend logic and User interface of web site.

Title	:	Visitor Management System.
Domain	:	Web Development.
Link	:	https://ghildiyalmanish.pythonanywhere.com/
Description	:	**Visitor Management System** is a single-user system. In this project, the **Admin** can add visitors with all necessary information. The system includes a **dashboard** feature that displays all data in the form of graphs and charts.
Role/ Responsibility	:	**Visitor Management System** involves designing the database and creating the user interface for web pages. In this project, I handled the **dashboard logic and implementation**

Title	:	Doctech
Domain	:	Web Development
Link	:	https://priyanshukothari.pythonanywhere.com/
Description	:	**Doctech** is a project where **doctors** can register themselves on the website with their complete information. **Patients** can search for doctors based on **fees, location, and experience**. Patients can book appointments in their **preferred time slots**. The system maintains **patient medical history**, including all necessary details and the **next consultation date**.
Role/ Responsibility	:	Developed the frontend of the website and design and implement the logic of patients medical history[Patient Dashboard].

PROFILE SUMMARY

- Strong communication skills, good in client interaction with positive approach.
- Worked and managed several projects at the same time.
- Understanding of project principals in agile methodologies.
- Good team player and also set coordination with QA team for the projects.
- Experience in preparing the Project Planning Reports, Analyzing client requirements and feedbacks.
- Always eager to take ownership and responsibility of tasks, self-driven, and also I'm very quick to learn new technologies.
